

Are you safe at home?

Hair straighteners can cause serious burns to children.

Did you know?

Hair straighteners can reach in excess of **200 degrees** which is hot enough to fry an egg! They can also take as long as **40 minutes** to cool down.

To prevent this follow the three steps below:

- 1** Switch them off straight away
- 2** Slide them into a thermal bag
- 3** Store them out of reach of children
